Chairman's statement

Introduction

On behalf of the Board of Directors of African Sun Limited and its subsidiaries ("the Group"), I am pleased to present to you the audited, condensed, consolidated financial statements for the year ended 31 December 2023.

Operating environment

The past year has been significant for the Group as we continue to recover from the impact of the COVID-19 pandemic, with the Group achieving an occupancy rate of 52% which surpassed the 2019 pre-pandemic occupancy level of 46%. The sustained recovery of international tourism resulted in an improvement of the occupancies, despite the ongoing global inflation and geopolitical tensions. According to the United Nations World Tourism Organization ("UNWTO") World Tourism Barometer, international tourism ended 2023 at 88% of pre-pandemic levels, with an estimated 1.3 billion global travellers.

At the start of the reporting period, the domestic operating environment was characterised by reduced inflation and market stability in response to the various initiatives introduced by the authorities to instill economic confidence, foster market discipline, and bolster local currency demand. However, the macroeconomic environment became turbulent from the latter part of the first quarter with significant inflationary pressures and exchange rate volatilities. Annual inflation, as measured by the movement in the official exchange rate, was 780% for the 2023 financial year as compared to 520% for the prior year.

The disparity between the "parallel" market exchange rate and the official exchange rate continued to exert pressure on operating margins, as a result of the notable mismatch between the pricing exchange rate for goods and services in Zimbabwe Dollar ("ZWL"), the exchange rate used by suppliers and the exchange rate used to liquidate foreign currency into ZWL.

To mitigate these challenges, the Group is implementing various initiatives in procurement to minimize the effects of inflationary cost escalations. Additionally, The Group will continue strategic engagements with key service providers to reduce high utility costs.

Change in functional currency

The Group changed its functional currency from ZWL to United States Dollars ("USD") on 1 January 2023. Leading up to 31 December 2022, the Group recorded a steady increase in the use of foreign currency across its businesses. This increase was also highlighted by the Reserve Bank of Zimbabwe Governor in his 2023 midterm monetary policy statement presented on 9 August 2023, in which he reported that 70% of the transactions in the economy and 65% of customer bank deposits were in USD. In line with these macroeconomic developments, the Directors assessed and concluded that the Group's functional currency had changed from ZWL to USD. The change in the Group's functional currency is further supported by the Listing Requirements of the Victoria Falls Stock Exchange ("VFEX"), which requires issuers to present financial statements in USD. For further details, refer to note 4 below.

The Group complied with the guidance of the International Accounting Standards ("IAS 21"), "The Effects of Changes in Foreign Exchange Rates," which directs entities operating in hyperinflationary economies to translate their last reported inflation-adjusted financial statements using the closing exchange rate at the reporting date to derive and present comparative financial statements under a newly assessed functional currency.

While the Directors have applied the guidance of IAS 21 to present the comparative financial information the following key factors should be noted:

- The 2022 ZWL internal inflation rate of the Group more closely matches movements in foreign exchange rates which are significantly different to the price index used in 2022 to adjust for inflation.
- There were significant distortions between the official exchange rate during the 2022 year and the pricing exchange for goods and services.

Chairman's statement (continued)

The Directors are of the view that the above factors result in the 2022 comparative information being questionable as a measure of the historic financial performance of the Group and accordingly, would like to advise users to exercise caution in their use.

Going forward the Directors believe the USD functional currency will better portray the Group's financial performance, produce financial reports that are easily comparable year-on-year, and make it easier to track key performance metrics.

Financial performance

During the year under review, the Group posted an operating profit of USD 3.74 million. The Group, however, recorded a marginal profit after tax from continuing operations of USD 0.52 million, largely as a result of a harsh macroeconomic operating environment, characterised by costs escalating at a higher rate than revenues, compounded by material exchange rate losses triggered by the above mentioned rebasing of the Group's functional currency, as highlighted below. The Group had a high effective tax rate for the year under review, worsened by declining values of capital allowances due to inflation.

Revenue

The Group revenue was USD 54.73 million up 30% against the comparable period. The improved performance was driven by firmer Average Daily Rates ("ADR") which closed 2023 at USD 110, an increase of 39% against USD 79 achieved during the comparable period as a result of changes in customer mix. Hotel occupancies increased to 52%, 6 percentage points above 2022. Revenue per Available Room ("RevPAR") for accommodation revenue increased by 58% to USD 57, up from USD 36 in the comparative period.

Operating expenses

The Group's operating expenses, excluding depreciation, increased by 43% to USD 27.63 million compared to USD 19.29 million in 2022 driven largely by exchange rate volatility, inflationary pressures, and the crystallisation of expenses in USD as the economy continued to dollarise

at a rapid pace. The Group will continue to monitor costs and implement various cost-saving initiatives.

Profitability

Earnings before interest, tax, depreciation, and amortisation ("EBITDA") was USD 9.45 million, down from USD 17.86 million in 2022, and the loss for the period was USD 0.36 million. Two of the Group's hotels under external leases had their base rentals changed from ZWL to USD, and this had the downstream effect of significantly increasing the lease liability interest and right-of-use assets depreciation compared to 2022.

The discontinued operations loss of USD 0.89 million largely comprises property and equipment impairments post the closure of The Kingdom at Victoria Falls Hotel and the Makasa Sun Casino. This follows the mutual termination of the lease at The Kingdom at Victoria Falls Hotel, due to an untenable lease tenure. The Group will continue looking for suitable expansion opportunities in appropriate locations and with the right timing and funding structures.

With regards to liquidity, the Group operated free of debt and had cash and cash equivalents of USD 10.87 million as at 31 December 2023. The Group is currently in discussions with leading financial institutions to secure funding to complement its healthy cash balances for deployment in carrying out accelerated material hotel refurbishment projects.

Portfolio transformation: hotel refurbishments

Our cash deployment strategy mainly focuses on completing targeted hotel refurbishments to enhance guest experience. During the period under review, we continued to prioritize strategic capital allocation initiatives. This included the completion of the refurbishment of the remaining 46 rooms at Hwange Safari Lodge and the refurbishment of the public areas which is progressing well. The refurbishment of the public areas at Troutbeck and the Great Zimbabwe conference centre was also completed during the period under review.

Dividend declaration

Interim dividend

The Board approved an interim dividend of USD 750,035, which was paid in January 2024.

Final dividend

The Board resolved to declare a final dividend of USD 350,000 for the year ended 31 December 2023, to be paid out of retained earnings. This brings the total dividend for the year to USD 1.10 million. While the Group has made an attributable loss for the financial year, it has maintained its strong cash-generating capacity. The Group's cash generated from operating activities amounted to USD 5.51 million for the financial year under review. The detailed dividend notice will be circulated separately.

Outlook

Looking at the year ahead, the UNWTO forecasts international tourist arrivals to fully recover to prepandemic levels in 2024, with initial estimates pointing to a 2% growth above the 2019 levels, underpinned by increased air connectivity, and continued recovery of Asian markets and destinations. However, persisting global inflation and rising oil prices translating into higher transport and accommodation costs could weigh down on spending patterns and demand over the forecast period.

On the domestic front, we anticipate yield on the growing demand for Meetings, Incentives, Conferencing, and Events ("MICE") business as well as benefits from several high-profile events, including the Zimbabwe International Trade Fair ("ZITF") and the Victoria Falls Carnival (which event we are hosting at Elephant Hills Resort and Conference Centre), among others.

While macroeconomic uncertainty around inflation and currency instability persists, we are fortunate to have the liquidity and financial flexibility to make prudent investments, aligning with our vision of ensuring a seamless and enjoyable guest experience. During 2024, we have planned significant capital investments into enabling Information Technology and further hotel refurbishments. These investments set the stage for a sustainable growth trajectory for the Group and enhanced returns for our shareholders.

Directorate changes

Dr. Emmanuel Fundira retired as the Chairman of the Board on 29 June 2023, after serving the Group for over 10 years. I was appointed Chairman of the Board of Directors effective 10 July 2023.

Mr. Ndangariro Mutizwa stepped down as the Chief Finance Officer on 30 June 2023 and Mr. Lewis Chikara was appointed Chief Finance Officer effective 1 October 2023.

Mr. Lawrence Ward ("Laurie") was appointed as the Chief Operating Officer effective 8 December 2023.

On behalf of the African Sun Board, I would like to take this opportunity to express my gratitude to Emmanuel, and Ndangariro for their service to the Group and wish them all the best in their future endeavors. In the same vein, I would also like to extend a warm welcome to Lewis and Laurie and wish them the best in their tenure.

Appreciation

I would like to express my heartfelt gratitude to our board, executive team, staff, shareholders, and all our broader stakeholders. Your unwavering support and commitment to our vision has been invaluable in getting us to where we are today. Thank you for your continued patronage and support.

1 Reporting entity

African Sun Limited (referred to as "the Company") is a Zimbabwean corporation operating as part of a larger group (referred to as "the Group"). The Group's primary activities involve managing ten hotels, operating two Lodges in Zimbabwe under a timeshare model, and operating a sales and marketing office in South Africa that focuses on international and regional sales. In addition to its hospitality operations, the Group also has a real estate division. This division owns seven hotel buildings that are operated by the hotel division. Furthermore, the Group holds more than 3,100 hectares of land across Zimbabwe, with 2,630 hectares primarily held for capital appreciation or future development purposes.

As a Zimbabwean corporation, the Company is incorporated and domiciled in Zimbabwe. It is publicly listed on the Victoria Falls Stock Exchange (VFEX). The majority shareholder of the Company is Arden Capital Management (Private) Limited, which owns 60.42% (2022: 60.42%) of the ordinary share capital of the Company.

The Company's registered address is Monomotapa Hotel, Number 54 Park Lane Road, Harare, Zimbabwe.

These condensed consolidated financial statements were approved for issue by the Directors on 25 April 2024.

2 Basis of preparation

The condensed consolidated financial statements as of 31 December 2023, include the financial statements of African Sun Limited and its subsidiaries. These statements comply with the recognition and measurement requirements of International Financial Reporting Standards (IFRS) and the disclosure requirements of IAS 34 "Interim Financial Reporting." Selected explanatory notes are provided to clarify significant events and transactions that impact the Group's performance and financial position. The condensed consolidated financial statements are prepared using the historical cost convention, with modifications made for the revaluation of investment property, biological assets, financial assets, and property and equipment, as required by the Zimbabwe Companies and other Business Entities Act (Chapter 24:31) and the VFEX Listing Requirements.

Preparing condensed consolidated financial statements in accordance with IFRS involves the use of critical accounting estimates and requires management to exercise judgment when applying the Group's accounting policies. Note 6 discloses the areas that involve a higher degree of judgment or complexity, including assumptions and estimates that are significant to the financial statements.

The condensed consolidated financial statements are presented in United States Dollars (USD), and all amounts are rounded to the nearest dollar, unless otherwise stated.

3 Accounting policies

The accounting policies utilized in the preparation of these condensed consolidated financial statements remain consistent with the most recent financial statements, unless otherwise indicated. For comprehensive disclosures and a complete understanding of the accounting policies employed, please refer to the full set of financial statements provided in our annual report.

4 Change in functional and presentation currency

The Group changed its functional currency and presentation from Zimbabwe Dollars ("ZWL") to United States Dollars ("USD") with effect from 1 January 2023.

This change was driven by several factors, including the steady increase in the use of foreign currency, particularly USD, across the Group's businesses following the promulgation of Statutory Instrument (SI) 185 of 2020 on 24 July 2020. The Reserve Bank of Zimbabwe Governor reported during the 2023 mid-monetary policy statement presentation that 70% of the economy transactions and 65% of customer deposits were in USD. This trend was already reflected in the Group's revenue and expenditure transactions.

In accordance with the requirements of IAS 21, "The Effects of Changes in Foreign Exchange Rates," management assessed the currency that best reflected the underlying transactions, events, and conditions relevant to the Group. The assessment considered the following factors:

- (i) As of 31 December 2022, USD became the predominant currency utilized for settling transactions associated with rooms, food and beverage, and residential properties, representing more than 60% of the Group's total revenue.
- (ii) Due to hyperinflation of the ZWL currency, prices of rooms, food, beverage, and properties were indexed against the USD. The Group's pricing policies were mainly influenced by USD inputs.
- (iii) The Group experienced a rise in USD expenditures for materials, labor, and other costs associated with providing goods and services, driven by increased USD receipts and demand from suppliers.
- (iv) Due to ZWL currency devaluation, the Group preferred to retain USD receipts generated from its operating activities while disposing of ZWL currency as soon as it was generated.

Based on these factors, the Group concluded that there was a change in its functional currency from ZWL to USD, effective from 1 January 2023. The change in functional currency was applied prospectively.

Additionally, African Sun Limited, listed on the VFEX on 14 April 2023, and adopted USD as its presentation currency in compliance with the VFEX listing requirements, which mandate financial statements to be presented in USD.

Translation on date of change of functional currency

In the past, the Group's financial statements were reported in Zimbabwe Dollars (ZWL), a currency that was subject to hyperinflation. In accordance with IAS 29, "Financial Reporting in Hyperinflationary Economies," the Group restated its historical financial statements to reflect the effects of hyperinflation.

IAS 21 requires entities operating in hyperinflationary economies to translate their last reported inflation-adjusted financial statements using the closing exchange rate at the last reporting date, which was the effective date of the change in functional currency. For the Group, the prior year comparative numbers were translated to USD using the closing rate of USD1:ZWL755 as of 31 December 2022, except for property and equipment and investment properties as disclosed in note 7.

The resulting translated amounts for non-monetary items were treated as their historical cost from the date of translation going forward. This translation process ensured that the prior year comparative numbers reflected the restated values in USD, taking into account the effects of hyperinflation on the financial statements.

5 Going concern

The Directors have assessed the ability of the Group and the Company to continue as going concern and are of the view that, the preparation of these financial statements on a going concern basis is appropriate.

Despite the lingering COVID 19 effects and the economic challenges, the global tourism industry remained resilient in its recovery. According to UNWTO World Tourism Barometer, international tourism ended 2023 at 88% of pre-pandemic levels, with an estimated 1.3 billion international arrivals and tourism experts believe international tourism is well on track to return to pre-pandemic levels in 2024. In line with the recovering international tourism, the hotel segment has fully recovered to pre-pandemic business at both occupancy and revenue levels.

In their going concern assessment, the Directors considered the, projected performance of the tourism industry, the cash flow and liquidity projections, including key commitments for a period exceeding 12 months from the reporting date. However, should the Group performance be subdued, the Group has enough cash resources to meet all unavoidable operating costs and to continue operations as a going concern in a responsible and sustainable manner. The Group remains debt free, representing leveraging opportunities should there be need for debt finance in the foreseeable future.

The Group maintains a positive outlook on its ability to recover from the loss incurred during the year, attributing it to a range of implemented measures, as detailed below:

- The completion of hotel refurbishments at Hwange Safari lodge and Troutbeck Resort is expected to enhance the average daily rate and improve occupancy levels.
- Strategic marketing initiatives with a specific focus on the international market are anticipated to bolster occupancy and improve average daily rates.
- The Group has plans to finalize the development of 55 residential stands, and the subsequent sale of these properties
 will contribute to improved revenues and liquidity.
- Furthermore, the Group will be implementing various cost containment strategies to align overheads with business levels.

6 Accounting estimates

When preparing the Group's consolidated financial statements, management exercises judgment, makes estimates, and utilizes assumptions regarding the recognition and measurement of assets, liabilities, revenue, and expenses. There are several areas where these estimates, judgments, and assumptions made by management have a significant impact on the condensed consolidated financial statements. These areas include:

- (i) Determination of fair values of investment property, property and equipment;
- (ii) Useful lives of property and equipment;
- (ii) Tax liability computations;
- (iv) Measurement of expected credit losses on financial assets.

7 Restatement of property and equipment and investment property opening balances

The Group changed its functional currency to USD on 01 January 2023 (refer to note 4). As required by IAS 21, inflation-adjusted transactions and balances as at the last reporting date 31 December 2022 were translated to USD using the closing official rate of ZWL1:USD755. On 31 December 2022, the Directors had engaged a professional valuer to value property and equipment, and investment property in both ZWL and USD due to disruptions in the macro-economic environment between USD and ZWL transactions. Directors noted that the property and equipment and investment property balances translated in accordance with IAS 21 were overstated compared to the USD fair values determined by the professional valuer on the same date, 31 December 2022. This was due to use of the ZWL valuation inputs at 31 December 2022 which had an implied correlation with the alternative market rates.

In an endeavour to achieve fair presentation, the Directors resolved to adopt the USD valuation of property and equipment and investment property as at 31 December 2022 as opening balances to enable comparability of financial information.

The effect of the restatement is as follows:

As disclosed in note 7, the opening balance of the property and equipment was restated for fair presentation. As of 31 December 2023, the property and equipment underwent a revaluation conducted by an independent valuer, in accordance with the Group's policy of subsequently measuring all property and equipment assets using the revaluation model. The categories of Leasehold Improvement, Capital Work in Progress, and Service Stocks were carried at cost and were not subjected to valuation.

| Balance at the end of the year | 10,680,900 | 12,419,021 |

To fairly represent the Group's comparative financial position after the change in functional currency, the investment properties were restated. The management concluded that valuing the investment property on 31 December 2022, in the newly adopted functional currency, USD, was the appropriate course of action. This decision was made to ensure a fair representation of the opening balance sheet following the change in functional currency. For more comprehensive information regarding the impact of restating the opening balances, please refer to note 7 detailed explanations and disclosures related to the effects of restatement.

Investment property includes real estate properties which are owned to earn rentals and for capital appreciation. Investment property is initially recognised at cost and subsequently measured at fair value, with fair value gains or losses being recognised in profit or loss.

The disposal of the investment property relates to the 3 units of the Elizabeth Windsor Gardens and a stand in Marlborough which was disposed during the current period. The Elizabeth Windsor Gardens are residential property units which were previously rented out to tenants.

13 Financial risk management

13.1 Liquidity risk

Liquidity risk is the risk that the Group may encounter difficulty in meeting obligations associated with financial liabilities that are settled by delivering cash or another financial asset.

Cash flow forecasting is performed at the operating entity level of the Group and aggregated by the Group Finance. Group Finance monitors rolling forecasts of the Group's liquidity requirements to ensure it has sufficient cash to meet operational needs while maintaining sufficient headroom on its undrawn committed borrowing facilities at all times so that the Group does not breach borrowing limits or covenants (where applicable) on any of its borrowing facilities. Such forecasting takes into consideration the Group's debt financing plans, covenant compliance, compliance with internal financial position ratio targets and, if applicable external regulatory or legal requirements, for example, currency restrictions.

Surplus cash held by the operating entities in excess of the amount required for working capital management are transferred to the Group Finance. Group Finance invests surplus cash in interest bearing current accounts, time deposits and money markets deposits, choosing instruments with appropriate maturities or sufficient liquidity to provide sufficient head-room as determined by the above-mentioned forecasts.

13.2 Credit risk

(i) Trade receivables

The Group utilizes the simplified approach outlined in IFRS 9 for measuring expected credit losses, which involves employing a lifetime expected credit loss allowance for all trade receivables. In order to assess the expected credit losses, trade receivables are grouped based on shared credit risk characteristics and the number of days past due.

The expected credit loss rates are derived from the payment profiles of sales made within a period of 60 months leading up to 31 December 2023.

The historical expected credit loss rates are modified to incorporate current and forward-looking information regarding macroeconomic factors that impact the customers' ability to settle the receivables. The Group has identified certain factors, such as current liquidity challenges, inflation, high interest rates, and foreign currency shortages, as the most significant in this regard. As a result, the historical credit loss rates have been adjusted to reflect the anticipated changes in these factors.

The closing expected credit loss allowances for trade receivables as at 31 December 2023 reconcile to the opening expected credit loss allowances as follows:

| | All figures in USD | 2023 | 2022 |
|------|--|-----------|---------|
| | Opening expected credit loss allowance as at 1 January | 640,381 | 176,507 |

| | Closing expected credit loss allowance | 219,282 | 640,381 |
| (ii) | Other financial assets at amortised cost Other financial assets at amortised cost include staff and key management personnel debtors and receivables from related parties. | | |
| | Opening expected credit loss allowance as at 1 January | 128,280 | 57,700 |
| | (Decrease)/increase in expected credit loss allowance recognised in profit or loss during the year | (40,444) | 70,580 |

14 Segment analysis

The executive committee assesses the performance of the operating segments based on:

- hotel occupancies;
- hotel revenue per available room ("RevPAR");
- hotel average daily room rate ("ADR"); and
- profitability.

Operating segments are made up of five strategic business segments which are;

1. Country and City Hotels

This segment comprise Troutbeck Resort, Holiday Inn Harare, Holiday Inn Bulawayo, Holiday Inn Mutare and Monomotapa Hotel. These hotels are headed by the Country and City Hotels Operations Executive who reports to the Chief Executive Officer.

2. Resort Hotels

The segment is made up of the Elephant Hills Resort and Conference Centre, Hwange Safari Lodge, Great Zimbabwe Hotel, and Caribbea Bay Resort. These hotels are headed by the Resort Hotels Operations Executive who reports to the Chief Executive Officer.

3. Partnership Hotel

This refers to The Victoria Falls Hotel which is jointly operated with Meikles (Private) Limited and is an affiliate of the Leading Hotels of the World ("LHW").

4. Real Estate

This segment owns eight hotels, seven of which are leased to the hotel operating segments above, two timeshare lodges, residential properties in Harare, vast undeveloped land across Zimbabwe, held either for sale or capital appreciation.

5. Other

This segment consists of three components: Sun Leisure, Central Office, and the South Africa Reservation Office. Sun Leisure serves as the Group's travel and tours division, offering various travel and leisure services. The Central Office provides centralized administrative and support functions to facilitate the operations of the Group. The South Africa Reservation Office operates as a regional sales and marketing office based in South Africa, with a primary focus on international and regional sales activities.

Revenue from contracts with customers

Segment revenue represents revenue earned by each business segment from external customers. Revenue from contracts with customers between segments are eliminated on consolidation. The revenue from external parties reported to the Executive Committee is measured in a manner consistent with how revenue is measured in the statement of comprehensive income.

The Group does not rely on any one specific customer as none of its customers contributes a minimum of 10% of its revenue.

The executive committee have reassessed the relevance of the current basis for determining segment analysis, with changes in hotel differentiations expected from 2024 onwards.

15 Provisions for other liabilities

Provisions are recorded when the Group has a present legal or constructive obligation as a result of past events, for which it is probable that an outflow of economic benefits will occur, and where a reliable estimate can be made of the amounts of the obligations. A reliable estimate is the amount the Group would rationally pay to settle the obligation at the reporting date.

The provisions balance is made up of the following:

| All figures in USD | 31 December 2023 | 31 December 2022 |
|--------------------|------------------|------------------|
| Leave pay | 584,786 | 215,006 |

| Performance bonus | 136,306 | 317,782 |
| Other | | 100,000 |
| | 1,783,416 | 1,695,112 |

(a) Leave pay

This amount is the Group's liability to pay employees for their annual leave days. Current provision is included in the statement of comprehensive income under operating expenses.

(b) Contractual claim

The amount represents a provision payable to a counterparty arising from a service contract.

(c) Other

This amount include provision for exit costs from all foreign entities and interest on contractual obligations. This balance has been reversed in the current year as management has concluded that the risk incurring further costs is now remote.

21 Reserves

21.1 Equity-settled share based payment reserve

According to the Group's share option scheme rules, options were granted on 18 March 2020, and were recognized at their fair value. The granted options have a vesting period of 3 years, meaning they became exercisable on 17 March 2023. Consequently, the fair value of the options was amortized over the course of the three year vesting period. The amortization expense represents the recognition of the share-based compensation cost over the vesting period, providing a systematic allocation of the fair value of the options granted. As a result, the Group recorded an additional expense of USD 10,004 related to the share options granted during the year.

Movements in share options during the year is as follows:

| All figures in USD | 31 December 2023 | 31 December 2022 |

| Expensed during the year | 10,004 | 30,391 |
| Outstanding at the end of the year | 223,300 | 213,296 |

All the share options vested on 17 March 2023 and no options were exercised as at 31 December 2023. All options will expire, if not exercised, four years after the date of grant.

21.2 Foreign currency translation reserve ("FCTR")

The FCTR balance is specific to the African Sun South African Branch, which uses the South African rand as its functional currency. The reserve represents the cumulative gains or losses arising from the translation of the South African branch's financial statements from its functional currency (South African rand) to the Group's functional currency, which is the United States of America dollar (USD). This reserve is used to account for the effects of exchange rate fluctuations between the functional currency and the reporting currency (USD). It ensures that the financial statements accurately reflect the impact of currency exchange rate changes on the South African branch's financial position and results.

Movements in FCTR reserve during the year are as follows:

| All figures in USD | 31 December 2023 | 31 December 2022 |
|--------------------------------------|------------------|------------------|
| Balance at the beginning of the year | 8,269,216 | 7,944,342 |
| Recognised during the year | 77,324 | 324,874 |
| Balance at the end of the year | 8,346,540 | 8,269,216 |

For the year ended 31 December 2023

22 Capital commitments

| All figures in USD | 31 December 2023 | 31 December 2022 |
|---|------------------|------------------|
| Authorised by Directors and contracted for | 1,800,000 | 2,397,000 |
| Authorised by Directors, but not contracted for | 9,219,317 | 6,768,633 |
| | 11,019,317 | 9,165,633 |

Capital commitments relate mainly to hotel properties refurbishments and acquisition of other items of property and equipment and will be financed mainly from normal operating cash flows and debt finance.

23 Events after reporting date

23.1 Fraud case

Subsequent to year end one of the Group's separate business units suffered a financial loss through fraudulent financial activities. The Group has engaged a forensic auditor to investigate the fraud and work on the fraud investigations is progressing well.

23.2 Introduction of new currency

On 5 April 2024, the Zimbabwean government implemented the replacement of the Zimbabwe Dollar (ZWL) currency with the Zimbabwean Gold currency (ZiG). During the transition, all balances denominated in ZWL were required to be converted to ZiG at the initial conversion rate of 2,498.7242. Going forward, ZiG will circulate alongside a basket of currencies. The introduction of ZiG does not impact transactions and balances that existed on 31 December 2023, as reported in the Group's f§inancial statements. The functional currency of the Group will continue to be the United States Dollar (USD). In future, management will assess the primary currency that best reflects the economic environment in which the Group generates and utilizes cash.

23.3 Discontinued operation: Sun Leisure Tours

Subsequent to year end, the Board resolved to cease the operations of Sun Leisure Tours, one of the Group's separate business units (SBU). Management is currently in the process of disposing and unbundling the SBU.

Change Of Presentation From Function To Nature

The Group's statement of comprehensive income has historically been presented based on function, in line with the requirements of International Accounting Standard ("IAS 1") Presentation of Financial Statements.

During the year ended 31 December 2023 the Directors reassessed the relevance of the current presentation of the statement of comprehensive income and concluded that presentation by nature is more reliable and relevant for a hospitality business for the following reasons:

*The presentation of revenue and expenses by their nature is widely adopted by hospitality business in the region particularly industry peers in South Africa and Botswana. Aligning presentation of the statement of comprehensive income with regional practices enhances consistency and facilitates industry-wide comparisons; and

*The function-based presentation of expenses involves subjective allocation of costs to functions. Presenting expenses by nature, the Group enhances greater relevance and reliability in presenting costs.

Based on this assessment the Directors have resolved to change the presentation of the statement of comprehensive income from presentation by function to presentation by nature for the reporting period beginning January 2024 and beyond.

The effect of the change in presentation from function to nature had the change been effected for the financial year ended 31 December 2023 would be as follows:
